

Harry's Game part 4A solution

War is imminent now but I am yet to discover what my true role in all this is to be. My journey here has led me through strange and unfamiliar territory and I find myself wondering how I got involved in such questionable affairs. I am obviously useful to Harry and his entourage, but am unsure what is in store for me; also what will happen if I do not cooperate. I must try to make him believe I have submitted into going along with their plans and commence my training schedule.

Since once again discovering my whereabouts, he is keeping a very close guard on me; so keeping in touch with my old friend and ally is imperative to my escape plans. Meanwhile, I will work on trying to find out their strategies by intercepting communications and enlisting some help of an agent I am in touch with who is usually very successful in message decryption.

My only hope is that I may be spared the horrors that my trusted friend faced when he dared to oppose their schemes.
