

Harry's Game part 5B solution

Harry, I fear that perhaps we have made some of our messages too easy for the others to crack, so as an extra precaution, I am writing this in secret, and delivering it to you personally, as well as encoding it with three different keys. The first is based on the QWERTY keyboard. The second uses the alphabet backwards. The third has the keyword ROSE. We cannot stop the war, and you should begin to expect the worst. I have instructed Rose to keep a low profile, and not to make a spectacle of herself, as this could result in her loyalties changing. There is a storm on the way, with heavy thunder, so try to avoid using telegraph signals and phone calls, as the weather may cause the lines to be knocked out.
