

### *Challenge 5 part A solution*

Harry, I havent got much time, the cult have been following me for several days and I havent been able to lose them. The number of tails has increased a lot in the last two hours and I dont think I can get away.

My sources in Uttar Pradesh tell me that the physicist Trevor Salinen has been kidnapped and that he has been taken to the power station being built there by the Nazis. As far as I can tell he works in quantum physics and he has written several papers on light transmission in crystal lattices. It is not clear why the Nazis want him, but it must be connected with the diamonds and the power plant.

If I am captured and I can get a message out I will move to using transposition ciphers, as the Nazis seem to be doing now they are easier to write out quickly.  
K
