

Challenge 5 part B solution

My dear Letzter, I have good news. The agent Kholi has been captured and is now being held at the hydro plant in Uttar Pradesh alongside the American physicist Salinen. For now Salinen is refusing to cooperate, and he has shown a tiresome degree of courage. We are hoping however that a recent development may come to our aid. The agent known as Charlie has arrived in Bombay and our agents are following her movements. She appears to be making plans to travel to Shiraz-i-Hind and if we capture her there we may be able to use her to persuade Salinen to work with us. Few of our enemies have the moral courage to watch someone else suffering for them. Our physicists tell me that their initial calculations suggest that the device should indeed be capable of producing sufficient energies for our purpose. With Salinens assistance we are on the brink of a new dawn. We alone will have the ability to control the power of the sun here on earth. The Reich will be avenged. HF
