Trojan

National Cipher Challenge 2014

Starts 2nd October
Register online
from 18th September

Presented by

The School of Mathematical Sciences
at the University of Southampton

Sponsored by

Winton Capital Management
Trinity College Cambridge
British Computer Society
Netcraft
GCHQ
IBM

A ship taken by pirates

off the port of Salalah is found
drifting with a cabin full of
communications equipment and
attack hardened computers.

Encrypted files on the servers
reveal that the ship was used as the
HQ of the Flag Day Associates, a world-
wide hacking group responsible
for chaos in the international
community.

Could this be the break
you need to bring
them to justice?
